EXPERIENCE

Web Designer & Developer

June 2024 - Present

Freelance

Pune, India

- Collaborate with diverse clients across various industries including product-based corporations, delivering custom websites and applications that enhance user engagement and lead to a 50% increase in client conversions.
- Design optimized and engaging websites, undertaking SEO duties for clients' sites, resulting in a 40% boost in organic traffic and a 25% increase in site speed, improving overall user experience.
- Utilize advanced design tools like Lunacy and Figma to prototype, wireframe and design high-fidelity user interfaces, leading to increased user retention and interactions across the board.

Developer

July 2021 - May 2024

Owen Jones and Partners

Portland, Oregon

- Developed custom code for clients like Disney & UnitedHealthGroup and internal teams, blending static and CMS-driven approaches to build and deliver over 15 business and product websites including e-commerce Shopify projects, improving load times by up to 2000ms.
- Spearheaded the development of internal toolkits and highly reusable web components and libraries, boosting developer productivity by 40% and cutting development preparation time in half.
- Devised CI/CD pipelines to enable automated builds, tests, containerization, and continuous delivery of modules, decreasing deployment time from days to hours and reducing errors by 25%.
- Integrated cutting-edge technologies into projects to modernize the project tech stack, resulting in a 35% increase in application performance and lowering maintenance costs by \$20,000 annually.

Software Development Intern

May 2020 - August 2020

Homepainter LLC

Ames, Iowa

- Designed, developed and tested high-quality, accessible webpages and Angular components for Homepainter's SaaS website, enhancing user experience and increasing site accessibility compliance by 25%.
- Wireframed and built out a new contractor platform from scratch in Angular, including the login state functionality, resulting in a 90% increase in monthly revenue and attracting 50 new contractors within the first quarter.
- Established a new code organization standard, leading to a 20% increase in code throughput and significantly enhancing documentation quality within the repository, reducing onboarding time for new developers by 30%.
